

ARE YOU A HEAVY SWEATER?

JOIN THE CARDIGAN STUDY

ABOUT THE STUDY:

- We are evaluating an investigational treatment for axillary hyperhidrosis (excessive underarm sweating).
- It is an 11-15 week study with 13 clinic visits.
- Participants will receive study gel (investigational or placebo). Results may vary.
- Compensation will be provided for time and travel.

Participants must be exhibiting symptoms of axillary hyperhidrosis for at least 6 months.

Participants must be available for appointments between 7-11am.

Participants must be ages 9+.

Participants must not be pregnant or breastfeeding.
