Annie Wester Jones, M.D.

Board-Certified Dermatologist

April 21, 2022

Dear Patient,

After thoughtful and careful consideration, I have decided to pursue the opportunity of a lifetime: to work full-time on research and development of new dermatologic treatments with a major pharmaceutical company. I will be working on dermatologic conditions that are important to me, many without current effective treatments, and I am hoping to help develop medications that can change the lives of more patients across the world than I could ever reach through my clinic work. For those who have experienced the near-miraculous effect of medications such as injectable biologics in psoriasis or eczema, you know they can be life changing.

I will be transitioning to this new career path in mid-May 2022.

It was a big decision to make as a doctor to stop seeing patients every day, and I did not make it lightly. I hope to resume a presence in our clinic, but it will necessarily be on a very limited basis and delayed for several months due to my new responsibilities.

I am honored that you trusted me with your skin health and allowed me to try and provide the highest quality of care to all of my patients at Colorado Center for Dermatology & Skin Surgery. I know you will be in great hands with our provider team.

Please wear your sunscreen, moisturize, check your skin carefully, and take good care of the largest organ in your body.

Sincerely,

Dr. Theodore J. Alkousakis
